

JEROME COUNTY AIRPORT MASTER PLAN UPDATE

The Jerome County Airport (JER) is finalizing a Master Plan Update to plan future facilities and identify improvement alternatives. The project is scheduled for completion in 2023. This planning effort will update the existing 2012 Airport Layout Plan (ALP). Since 2012, demand at the Airport has changed, and with it, the need for increased runway length and a development area plan for new hangars, apron space, and amenities.

Timeline:

PUBLIC OPEN HOUSE

Wednesday, December 14th

anytime from 4:00-5:30 pm

@

Precision Aviation

472 Highway 25, Hangar 20 at the Jerome County Airport, near the front entrance.

The master plan update process includes analyzing existing airport uses and facilities, forecasting future demands, and considering available land use options. The results of this analysis will produce short, intermediate, and long-term recommendations to the Airport and the Federal Aviation Authority (FAA).
